

**Is Evangelical Worship Evangelical? Tracing the major principles of Evangelical worship from the Reformation to the present.**

Beyond the written / non-written liturgical divide, there is a growing commonality of worship across Evangelical churches centring on sung worship that is different primarily in the quality of the worship group and AV facilities. However, the journey through the reform and then development of the corporate worship experience in churches that would deem themselves 'evangelical' would indicate that there are principles and practices that have been forgotten or lost along the way that may challenge whether the contemporary scene is centred on the good news of the gospel. This seminar will chart the major principles that have informed the journey and look at events and movements that played significant formative roles along the way.
